EDUCATION

- **Shandong University** Shandong, China
• *Mater of Technology - Computer Science and Technology* Sep. 2021 - Jun. 2024(expected)
Advisor: Prof. Yunhai Wang
GPA Overall/ Major: 3.5/3.7
Courses: Human-Computer Interaction, Interactive Data Analysis System, Artificial Intelligence, Machine Learning
- **Jiangsu University of Science and Technology** Jiangsu, China
• *Bachelor of Technology - Computer Science and Technology* Sep. 2017 - June 2021
GPA Overall/ Major/ Ranking: 3.8/ 3.9/ Top 2%
Courses: Operating Systems, Data Structures, Analysis Of Algorithms, Computer Graphics, Networking, Databases

PUBLICATIONS

- [P1] Yunhai Wang*, **Yuancheng Shen***, Yue Zhao, Haoyan Shi, Bongshin Lee. (2023). Authoring Data-Driven Chart Animations. In *IEEE Transactions on Visualization and Computer Graphics*. (Co-first author and the first is the professor, In Proceedings).
- [P2] **Yuancheng Shen**, Rui Ban, Xin Chen, Runduo Hua, Yunhai Wang. (2023). Anomaly Detection Algorithm for Network Device Configuration based on Configuration Statement Tree. In *Computer Science*. (Accepted in Mar. 2023; To appear in Nov. 2023).

RESEARCH EXPERIENCE

- **A Visual Grammar for Charting and Reverse Generation** Shandong University
Participant | Advisor: Yunhai Wang Apr 2023 - present
 - **Description:** The research concentrates on a static data visualization grammar for generating SVG charts and a reverse-engineering algorithm to automatically infer syntax expressions and data from existing SVG charts, streamlining the process of chart customization for easy and seamless modifications.
 - **Contribution:** Participated in discussions regarding the design of the visualization grammar and also did part of coding work; Contributed valuable insights to the idea of reverse-engineering during collaborative discussions.
- **PenTouchSelector: Selecting Elements in SVG Charts** Shandong University
Student Leader | Advisor: Yunhai Wang and Bongshin Lee Jan 2023 - present
 - **Description:** The research concentrates on a touchscreen-based SVG selection system with advanced modeling for accurate element selection and interactive recommendations in complex data charts.
 - **Contribution:** Proposed innovative ideas and models for distinguishing lasso and tracing methods, ensuring precise identification of selected elements for each method; Implemented interactive user feedback to handle uncertain selections, allowing users to make their choices.
- **Authoring Data-Driven Chart Animations [P1][Link]** Shandong University
Student Leader | Advisor: Yunhai Wang and Bongshin Lee Jun 2022 - Jun 2023
 - **Description:** The research concentrates on an intuitive tool that empowers users without programming skills to author expressive chart animations through visual language, interactive editing, and smart recommendation strategies.
 - **Contribution:** Researched data animation syntax and tools; Proposed and implemented innovative ideas in consultation with two advisors; Took responsibility for paper writing and illustrations.
 - **Achievement:** Developed an interactive tool based on Canis syntax, enabling users to author data-driven chart animations with ease; Written a research paper.
- **Anomaly Detection for Network Device Configuration [P2][Link]** Shandong University
Student Leader | Advisor: Yunhai Wang Sep 2021 - May 2022
 - **Description:** The research concentrates on configuration anomaly detection using over 10,000 configuration files from five manufacturers.
 - **Exploration:** Conducted an in-depth exploration of anomalies in document syntactic structure using big data analysis and statistical methods and offered comprehensive solutions.
 - **Solution:** Pioneered the development of a configuration statement trees and applied clustering analysis to detect rare anomaly patterns, enabling automated detection as a substitute for manual inspection.
 - **Achievement:** Achieved exceptional 85%+ accuracy in anomaly detection with the aid of anomaly samples and gave the modifications methods; Written a research paper and applied for a patent.

SELECTED HONORS AND AWARDS

- Postgraduate Excellent Student Award Fund, Shandong University Oct, 2021
- Outstanding Thesis Award, Jiangsu University of Science and Technology Jun, 2021
- Outstanding Graduates Award, Jiangsu University of Science and Technology Jun, 2021
- 1st Prize Scholarship, Jiangsu University of Science and Technology Oct, 2019
- 1st Prize in Higher Mathematics Competition(Top 0.05%), Jiangsu Aug, 2018

ACADEMIC ENGAGEMENTS

- **Review for an academic paper** Qingdao, China
Participated in reviewing a paper on interactive time-series data visualization May 2023
- **Participated in *The Geometric Design and Computing Conference*** Qingdao, China
Participated in the event, received experts and scholars & volunteered other conference services Aug 2022
- **Participated in *The China Visualization and Visual Analytics Conference*** Xining, China
Participated in the event Jul 2022

SKILLS

- **Languages:** GRE 329(Verbal 159, Quantitative 170, Writing 4.5), TOEFL 107
- **Tools:** TypeScript, JavaScript, NodeJs, Python, SQL, C++, R, Latex, Adobe Illustrator, PhotoShop
- **Soft Skills:** Leadership, Event Management, Writing, Public Speaking, Time Management
